

As shown in FIGS. 4 and 5, the pet display belt 21 is of somewhat similar construction to the lower or waist section of the vest as upper and lower annular, tubular, passageway portions 23 and 24 joined along their entire lengths, as indicated schematically by the broken lines in FIG. 4 and 5, and are integral with annular waist band forming strip 22, (also of heat sealable plastic), with the lower passageway portion 24 being attached to respective pocket-form animal receiving chambers 3' also attached to the waist band, and communicating with each other via a port 16'. Adjustable fastening members 26 of intermeshing multiple hook and eye type fabrics are provided on opposite ends of the waist band to secure the display belt about the waist of a wearer. When the belt is not worn it may be supported by a flat surface to provide a permanent home for the pets, as illustrated in FIG. 5.

In use, the pockets provide access of the wearer's hand for pet recovery and, feeding areas. Fluid wastes tend to gravitate to the pocket facilitating collection and removal while the passageways and pockets can be rinsed by attachment to a faucet.

Either article of clothing, could accommodate many different small such as mice, hamsters, gerbils, snakes and, possibly even insects. The vest could be provided with sleeves to form a coat or jacket and be of increased length to form an overcoat.

What I claim is:

1. A pet display vest for a person, having an elongate, enclosed, pet receiving, passageway extending thereacross with at least one closable pet admitting entry, at least part of the passageway being transparent so that, when the vest is worn, a pet moving along the passageway across a wearer's body can be viewed by a spectator.

2. A pet display vest according to claim 1 wherein at least the passageway is made from waterproof material and provided with ventilation apertures.

3. A pet display vest according to claim 2 which is made from a flexible plastic material.

4. A pet display vest according to claim 1 wherein the passageway extends at least partly around a body of the wearer.

5. A pet display vest according to claim 1 including a panel portion marked with indicia depicting scenes of one of a natural habitat of a pet and a story line of a pet, the indicia extending across part of a passageway.

6. A pet display vest according to claim 1 wherein said at least one closable pet admitting entry comprises a pet

receiving chamber of larger cross-sectional size than a maximum cross-sectional size of the passageway and having a closure member movable to an open position so as to permit hand access to the chamber for manual pet removal.

7. A pet display vest according to claim 6 wherein said pet receiving chamber forms a pocket located at a front of a waist portion of the vest.

8. A pet display vest according to claim 6 wherein said at least one closable pet admitting entry comprises two pet receiving chambers forming respective pockets located on respective opposite sides of a front of a waist portion of the vest, each chamber being of larger cross-section than the passageway and having a closure member movable to an open position so as to permit hand access to the chamber for manual pet removal.

9. A pet display vest according to claim 1 wherein said passageway extends around a waist portion, across a back portion and over shoulder portions of the vest.

10. A pet display belt comprising an elongate, enclosed, pet receiving, passageway with at least one closable pet admitting entry and means for releasably securing the passageway extending around a waist of a person, a vent means in the passageway for providing air to a pet therein, at least part of the passageway being transparent so that, when the belt is worn by a person, a pet moving along the passageway around a wearer's waist can be viewed by a spectator.

11. A pet display belt according to claim 10 wherein said at least one closable pet admitting entry comprises two pet receiving chambers forming respective pockets located on respective opposite sides of a front of the belt, each chamber being of larger cross-section than the passageway and having a closure member movable to an open position so as to permit hand access to the chamber for manual pet removal.

12. A pet display belt according to claim 10 wherein at least the passageway-forming passageway is made from waterproof material.

13. A pet display belt according to claim 11 which is made from a flexible waterproof plastic material.

14. Pet display clothing for a person having an inner layer and an outer layer providing between them a pet receiving enclosure with at least one, closable, pet admitting entry thereto, at least part of the outer layer being transparent so that a pet in the enclosure can be viewed by a spectator when the clothing is worn.
